

# UNGGIM Europe & Global Goals for Sustainable Development - more than indicators

# Maps create reality: Agloe town

Link Goal 17. Strengthen the means of implementation and revitalize the global partnership for sustainable development

# Cholera and Ebola: The data – information – knowledge – decision chain

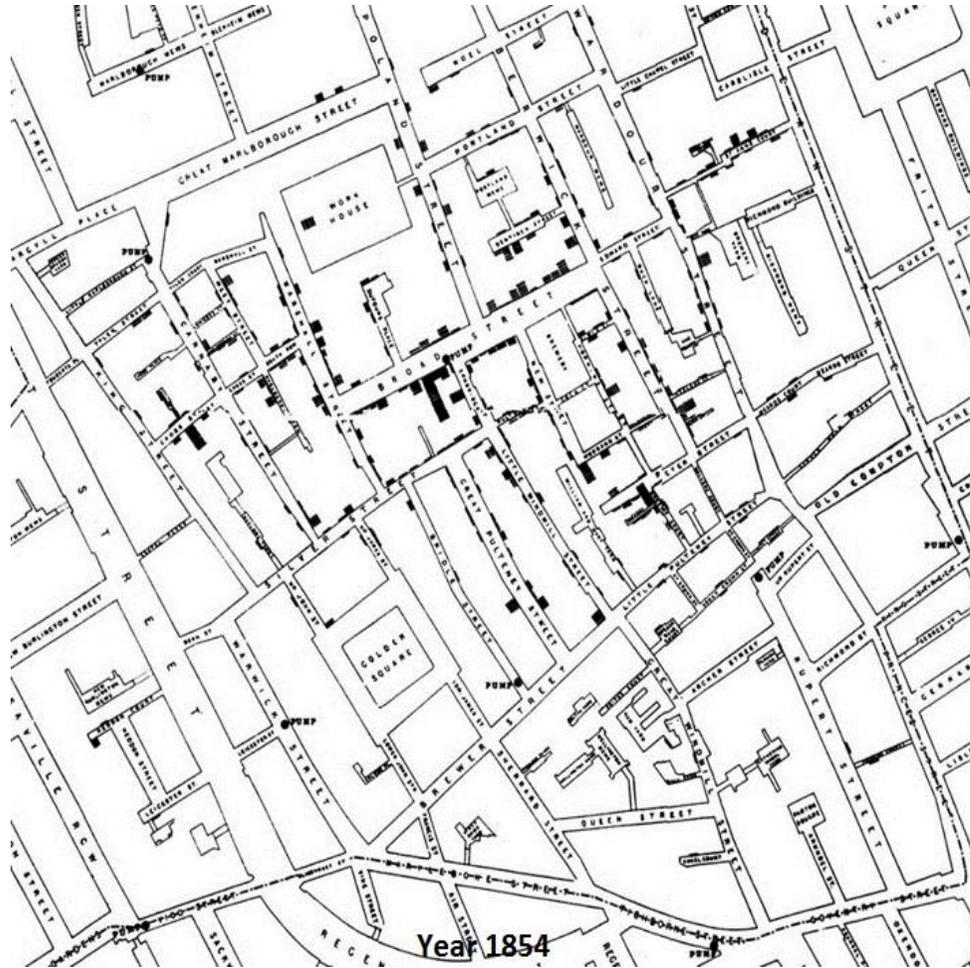

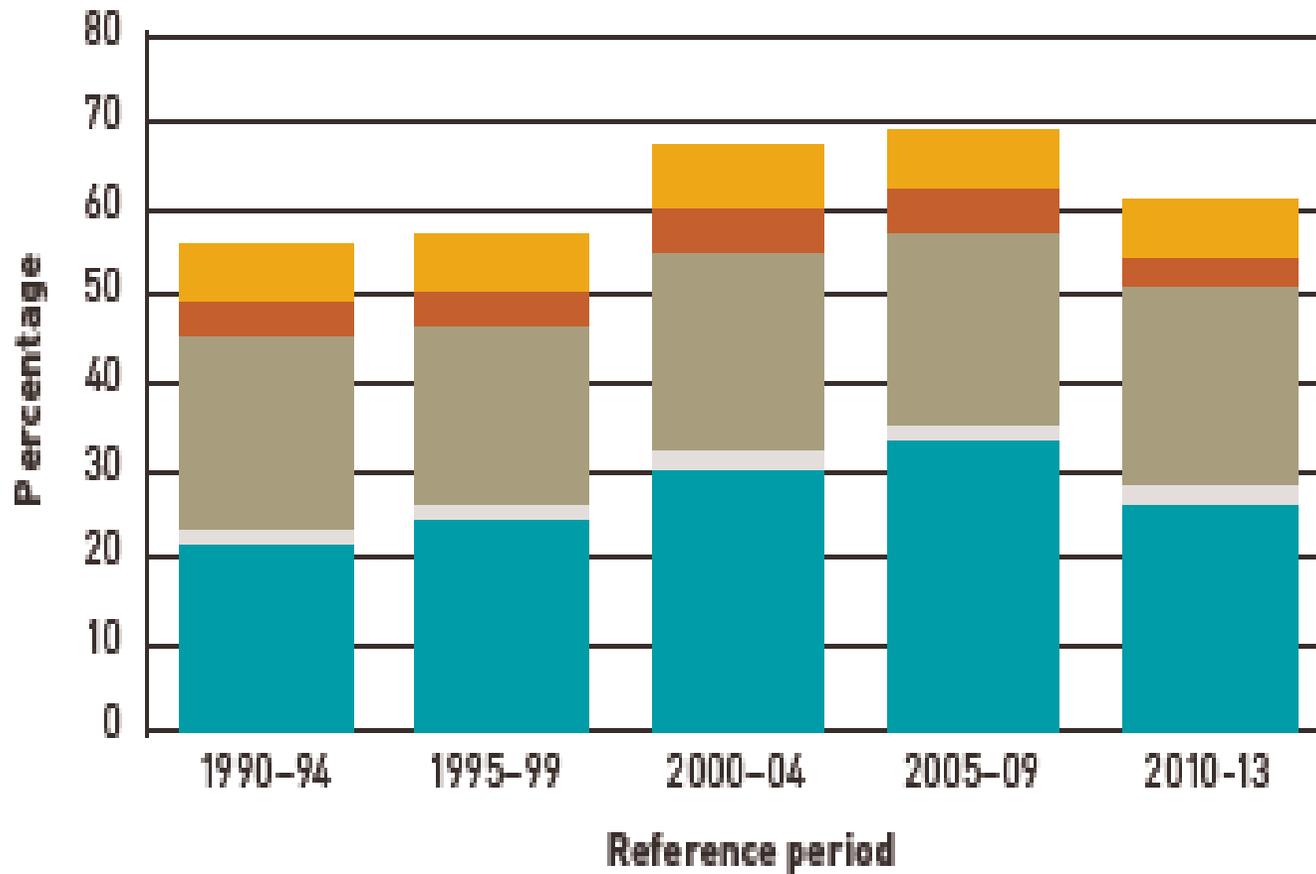

Photo: Justinc

**Link: Goal 3. Ensure healthy lives and promote well-being for all at all ages**

# From the UN data revolution to citizens

**Link: Goal 6. Ensure availability and sustainable management of water and sanitation for all**

# EU policy and Sustainable development at the centre

**Links: Goal 1. End poverty in all its forms everywhere**

**Goal 5: Achieve gender equality and empower all women and girls**

**Goal 2. End hunger, achieve food security (...) and promote sustainable agriculture**

# Experience sharing, capacity building *and* monitoring

- Help build technical & organisational capacities to secure equitable control and ownership over land and other natural resources.
- Bring geospatial literacy to decision makers and citizens to use information for change and transition to greener economies.
- Support decision making with data, information and knowledge – not just trends, but also evidence and solutions.
- Encourage geospatial data use to address and manage sustainable development challenges and then use the data to improve monitoring.

...Whilst also doing indicators.
