

JOINT UN-GGIM: EUROPE – ESS MEETING ON THE INTEGRATION OF
STATISTICAL AND GEOSPATIAL INFORMATION –
LUXEMBOURG – 31 MARCH 2017

Report and update from Working Group A on Core Data

François Chirié, Dominique Laurent, France

UN-GGIM: EUROPE

UNITED NATIONS INITIATIVE ON
GLOBAL GEOSPATIAL
INFORMATION MANAGEMENT

Progress of the Working Group since March 2016

Plan of the presentation

- WGA Work Plan
- **Common principles** for
“Recommendation for Content” of Core Data
- Draft recommendations for content
of core data themes **CP, AD, GN**

WGA Work Plan

UN-GGIM: EUROPE

UNITED NATIONS INITIATIVE ON
GLOBAL GEOSPATIAL
INFORMATION MANAGEMENT

WGA Work Plan

Political and financial framework

Additional
measures

Good practices
Case studies

Remains to be
done (2018)

Economic model for production and diffusion of core data

licensing

Open
data

Input from existing
initiatives and
projects

Production
or upgrade
processes

Remains to be
done (2018)

Recommendations for Content

Core data
scope

Recommendations
for Content

Core Data Scope: done
Recommendations for
content (2016-2017):
- Common Principles
- 3 themes drafted

Reminder: Core Data Scope

The 14 selected core data themes

Annex I

Coordinate Reference Systems

Geographical Grid Systems

Geographical Names

Administrative Units

Addresses

Cadastral Parcels

Transport Networks

Hydrography

Protected Sites

Annex II

Elevation

Land Cover

OrthoImagery

Geology

Annex III

Statistical units

Buildings

Soil

Land use

Human health and safety

Utility and governmental services

Environmental monitoring facilities

Production and industrial facilities

Agricultural and aquaculture facilities

Population distribution - demography

Area management/restriction/regulation

Natural risk zones

Atmospheric conditions

Meteorological geographical features

Oceanographic geographical features

Sea regions

Bio-geographical regions

Habitats and biotopes

Species distribution

Energy resources

Mineral resources

Common Principles

For “Recommendations for Content” of Core Data

UN-GGIM: EUROPE

UNITED NATIONS INITIATIVE ON
GLOBAL GEOSPATIAL
INFORMATION MANAGEMENT

Recommendations for Content Principles - Objectives

- INSPIRE aims to harmonise existing data
 - Common data model → first level of interoperability
 - But still heterogeneous data
 - voidable attributes, level of detail not defined
 - Core data aims to complement INSPIRE by ensuring common (minimum) content
- WG A Deliverables have been renamed
- From “Core Data Specifications”
 - To “Recommendations for Content”

Recommendations for Content Principles - Methodology

- Starting points
 - INSPIRE data specifications
 - SDG user requirements
- Define priorities, extract core data
 - From INSPIRE data model & theme scope
- Decide on levels of detail, quality criteria
 - To ensure data homogeneity

UN-GGIM: EUROPE

UNITED NATIONS INITIATIVE ON
GLOBAL GEOSPATIAL
INFORMATION MANAGEMENT

Recommendations for Content Principles (cont.)

Step-wise approach:

- **Core recommendation**: 1st priority, achievable, ideally short term action
- **Good practice**: 2nd priority, brings added value to core data, to be encouraged
- *Considerations for future*: potential core data in long term

Draft Recommendations for Content

**First Results of the Working Group
For Themes CP, AD, GN**

UN-GGIM: EUROPE

UNITED NATIONS INITIATIVE ON
GLOBAL GEOSPATIAL
INFORMATION MANAGEMENT

Draft Recommendations for Content

**First Results of the Working Group
Theme “Cadastral Parcels”**

UN-GGIM: EUROPE

UNITED NATIONS INITIATIVE ON
GLOBAL GEOSPATIAL
INFORMATION MANAGEMENT

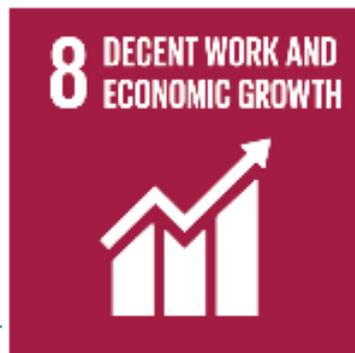

Geographic extent

- **Core recommendation:** have core CP (vector) data on whole territory, according to national law
- Potential impact on data producers
 - Encourage achievement of cadastre under elaboration
- Benefits for SDG
 - Security of land ownership & transactions
 - Enables investments (mortgage) & economic growth

UN-GGIM
UNITED NATIONS INITIATIVE ON
GLOBAL GEOSPATIAL
INFORMATION MANAGEMENT

Geographic extent

Good practice: have CP data on whole land territory, including public domain

- Potential impact on member states:
 - Possible change in national legislation
 - Need to survey missing parts
- Potential benefits
 - Better manage public land
 - E.g. SDG indicator 11.7.1: “The average share of the built-up areas of cities in open space in public ownership and use”

UN-GGIM
UNITED NATIONS INITIATIVE ON
GLOBAL GEOSPATIAL
INFORMATION MANAGEMENT

Geographic Extent

- **Consideration for future:** have marine cadaster
- Conclusion of cadastral community WG: Not yet mature
 - e.g. what has to be surveyed?
- Potential benefits for SDG
 - Sustainable development of oceans

UN-GGIM
UNITED NATIONS INITIATIVE ON
GLOBAL GEOSPATIAL
INFORMATION MANAGEMENT

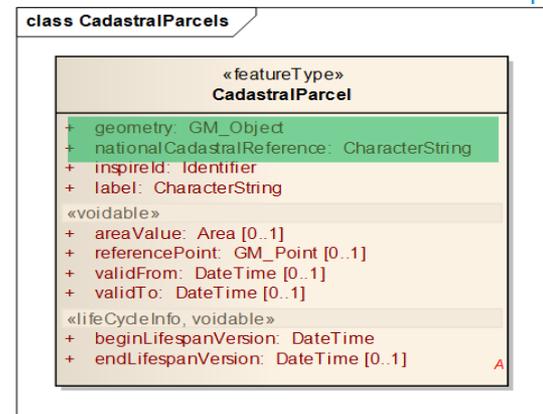

Strategy for Core Cadastral Parcels

- Encourage cadastral parcels to form a partition of territory
 - Geographic extent
 - Completeness
 - Topology (no gaps or overlaps)
 - Cadastral parcels as single areas

- Encouraging efficient link with land registry
 - Model focus on national cadastral reference
 - Temporal consistency between cadastral map and land registry

UN-GGIM
UNITED NATIONS INITIATIVE ON
GLOBAL GEOSPATIAL
INFORMATION MANAGEMENT

Draft Recommendations for Content

**First Results of the Working Group
Theme “Addresses”**

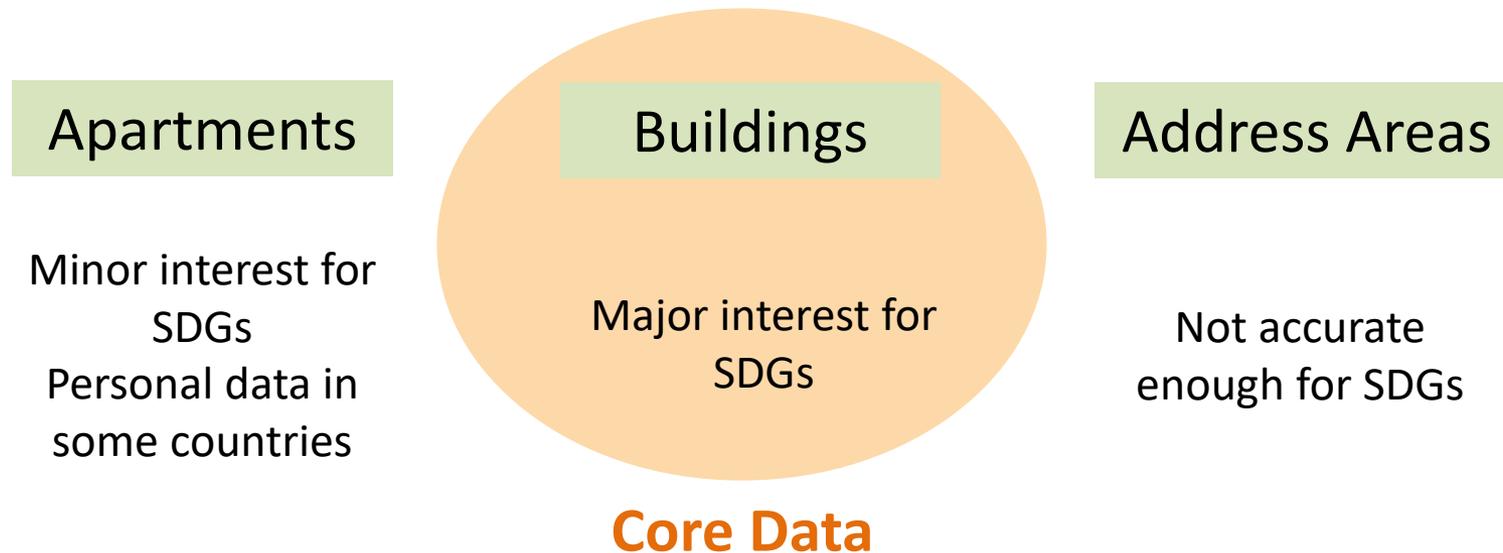

UN-GGIM: EUROPE

UNITED NATIONS INITIATIVE ON
GLOBAL GEOSPATIAL
INFORMATION MANAGEMENT

Core Address Data - Scope

- Proper level of address data

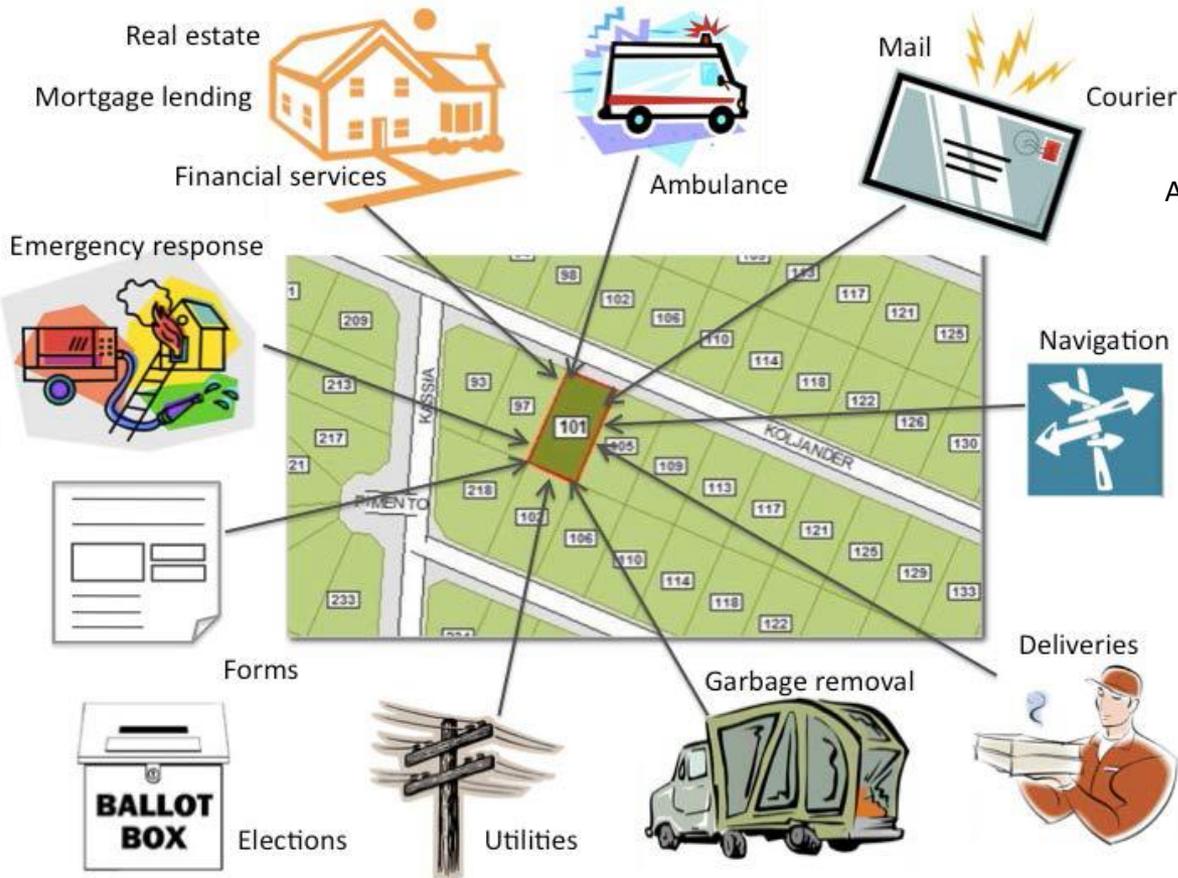

- **Core recommendation:**
 - The core addressable object is a building that has its own personnel entrance

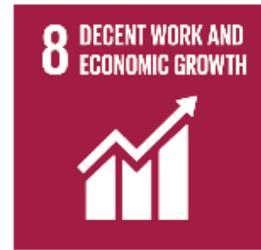

Core Address Data – Scope

Reduce the number of deaths and illnesses

Access to basic services

UN-GGIM
UNITED NATIONS INITIATIVE ON
GLOBAL GEOSPATIAL
INFORMATION MANAGEMENT

GEOSTAT 2 and AD Core Data

- Already considered by WG A
 - Completeness
 - Coverage
 - Accuracy (couple of meters)
 - ETRS-89
 - True address - Full street address
 - Reference AD data shared by all
 - Temporal management
- Not yet considered by WG A
 - Cross-theme consistency
 - Address has to be on the right side of the street and to be in the right SU
 - Need for nationally and officially agreed geocodes or identifiers

Priorities to be revised

Draft Recommendations for Content

**First Results of the Working Group
Theme “Geographical Names”**

UN-GGIM: EUROPE

UNITED NATIONS INITIATIVE ON
GLOBAL GEOSPATIAL
INFORMATION MANAGEMENT

GN context and scope

- Purpose
 - Avoid duplication of core data production
- Core theme GN limited to named place not present in other themes
 - Mainly populated areas (settlements, cities)
 - But also Landform (mountains ...), Land Cover (forest ...)
- GN data for 2 main use cases
 - Search criteria
 - in gazetteer services, geo-portals, geo-catalogues, ...
 - Mapping

Recommendations: Examples

- Use of EGN classification
 - For type of named place
 - All names that are in current use
- Search criteria
use case
- Names with language, status
 - Information on population
 - True geometry (generally surface)
- Selection criteria for
mapping use case

Next Steps

UN-GGIM: EUROPE

UNITED NATIONS INITIATIVE ON
GLOBAL GEOSPATIAL
INFORMATION MANAGEMENT

Draft Recommendations for Content Review Going On

- Drafts published on UN-GGIM: Europe website
<http://un-ggim-europe.org/content/wg-a-core-data>

- CP
- AD and GN coming soon

Core data to be adopted and promoted
By the geo-statistic community
not only by WG A

- Your review would be welcome for producing the Final Deliverable
 - Deadline: End of May for CP (tbc)
 - Expected Comments:
 - Unclear recommendations
 - Irrelevant recommendations
 - Important topics missing
