Methods

Ethics / Communication

Partnerships

Pilots

Challenges

- Exploration & tentative implementation
- Scientific Approach
- Cooperation, sharing of know-how
- Access to data, lack of skills, new user demands

Actions

- Big Data ESSnet: Pilot projects
 - 2015 2019 (FPA/SGA construction)
 - Exploring different big data sources
 - Characteristics of data, potential outputs, Methodology and Quality, IT requirements
 - Partnerships with data providers, academia, users
 - Cooperation with UN
- Big Data Competition
- Workshop Oct 2016

ESS Big Data Pilots

- List of pilot projects (Specific Grant Agreement)
 - Web scraping
 - job vacancies; enterprise characteristics
 - Smart meters
 - electricity consumption ; temporary vacant dwellings
 - Automatic Identification System (Ships)
 - vessel identification data
 - Mobile phone data
 - Preparing for Access to data
 - Scenario for using multiple inputs

Eurostat Pilot Activities

- Web activity evidence for nowcasting
 - Google Trends
 - Employment
- Wikipedia as source for statistics
 - Cultural and regional statistics
- Mobile communication data
 - Population
 - Urban
 - Tourism
- Flight Reservation Systems for true Origin/Destination
 - Amadeus Database
- Aircraft Tracking System
 - Satellite system to receive flight positions from aircrafts

Kust tevreden met verlengd paasweekend

Vandaag om 11:17 door llo | Bron: BELGA

De toeristische sector aan de kust is tevreden over het verlengde openingsweekend van de paasvakantie. Dat blijkt dinsdag uit een monitoring van provinciebedrijf Westtoer in samenwerking met Proximus en het Agentschap Wegen en Verkeer.

Met 150.000 dagtoeristen op Pasen, en 400.000 dagtoeristen verspreid over het hele paasweekend, blikt de kust tevreden terug op het startschot van de paasvakantie.

De vele evenementen in de kustgemeenten hebben tijdens de voorbije dagen gezorgd voor aangename vakantiesfeer', aldus Franky De Block, gedeputeerde en voorzitter Westtoer.

Ook voor het verblijfstoerisme schoot de paasvakantie goed uit de startblokken. Hotels noteerden een bezettingsgraad van 90 procent of meer. Bij de verhuur van vakantiewoningen worden degelijke cijfers genoteerd met een gemiddelde bezetting van 75 procent en iets meer reservaties in de eerste week, gaf Westtoer vorige week al mee, maar met de aankondiging van het uitstekende lenteweer in de loop van de week verwacht de sector nog tal van last-minuteboekingen.

A threat to official statistics?

Article released one day after 2015 Faster weekend about tourism in Belgian coast:

150 000 same-day visitors on Sunday, 400 000 during the entire long weekend

- Data based on a monitoring of the regional tourism board, in cooperation with the main mobile network operator Proximus and the road infrastructure administration;
- In comparison: Eurostat will receive data on same-day visitors for the 2nd quarter of 2015 (not a particular weekend) on 30 June 2016 (not the day after) for the entire country (not a coastal strip within a NUTS2 region);
- Methodology not clear, but it's a nice example of how flash estimates based on big data decreases the relevance of official statistics;

Mobile phone data

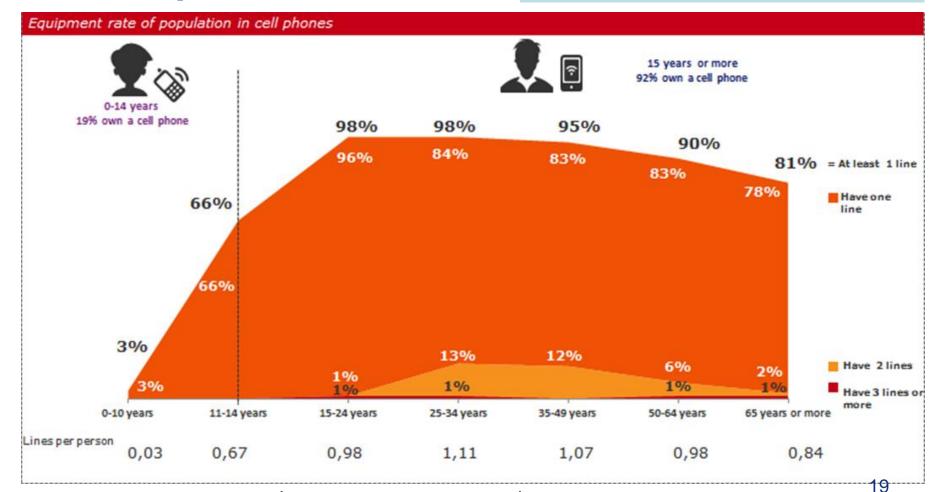

Pilot Projects

- Proximus / Statistics Belgium / Eurostat
 - Number of mobile phones per antenna (tesselation)
 - Typical weekday, Sunday
 - The location of each mobile phone is recognized after max 3 hours
 - Can we use the data to estimate population density by grid-cell?
 - Issues
 - Selectivity
 - Size of cells
 - Place of residence
 - ...

Mobile phone data

Promising, but some quality issues, e.g. coverage (representativeness?)

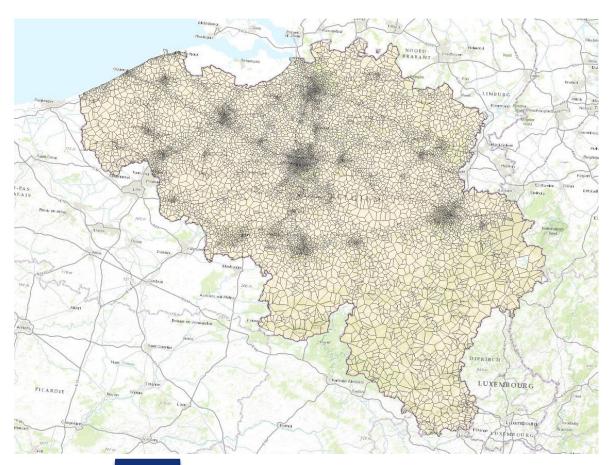

Source: DGE, SDP3E, bureau des études sur le tourisme et les catégories d'entreprise (France, Sept 2015)

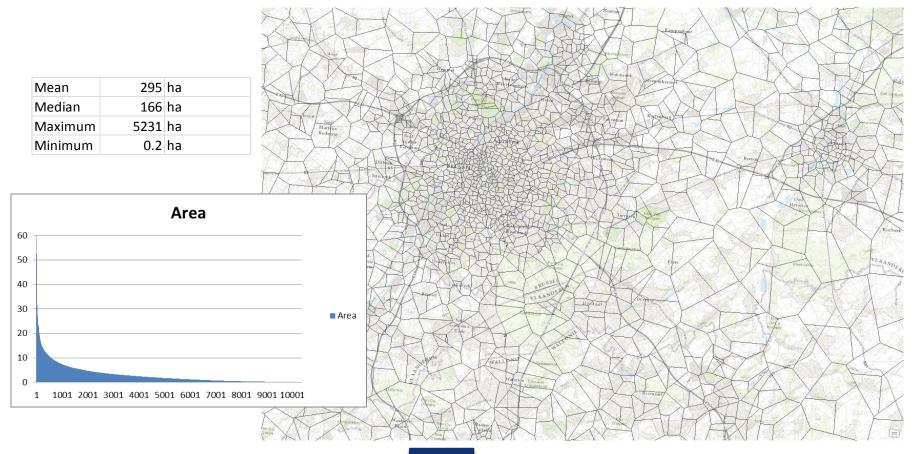

Mobile phone - radio cells

- Tesselation
- > 10,000 cells
- Combining 2,3,4 G cells

Mobile phone - radio cells

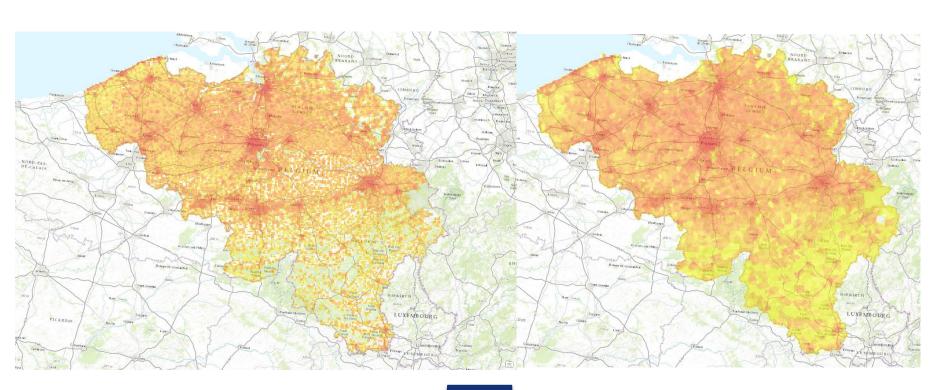

Mobile phone – population

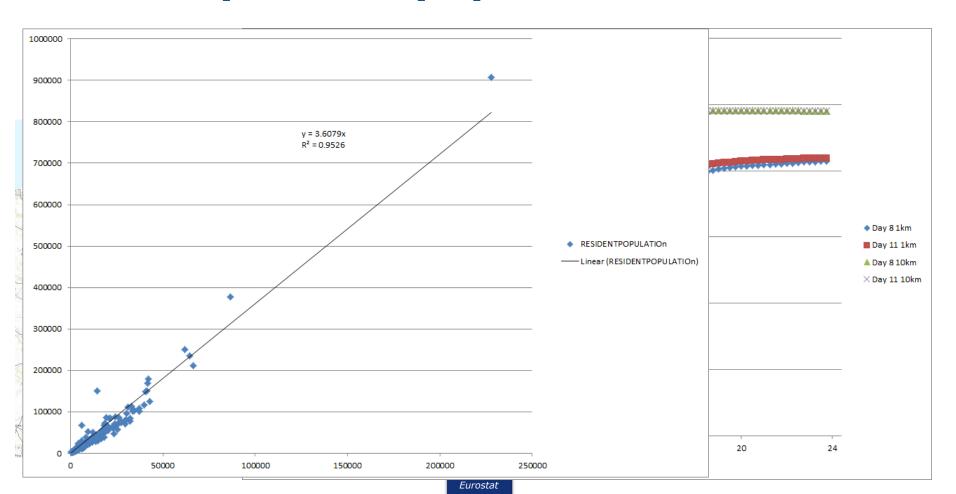

Census 2011

Mobile phones

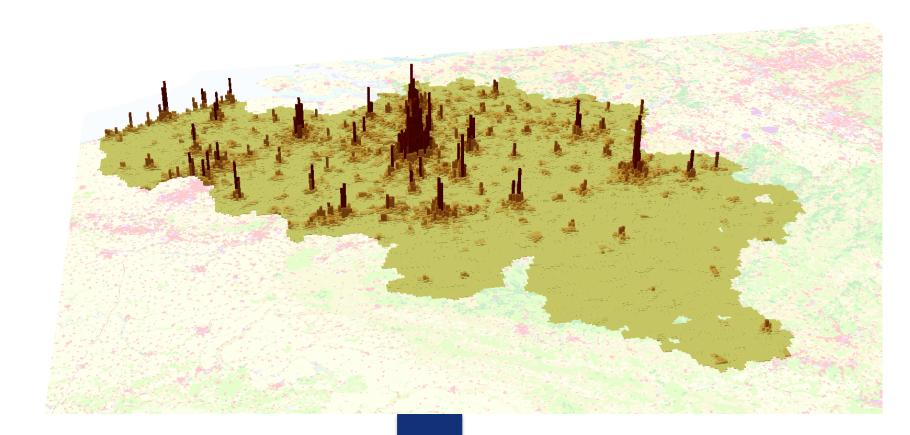

Mobile phone - population

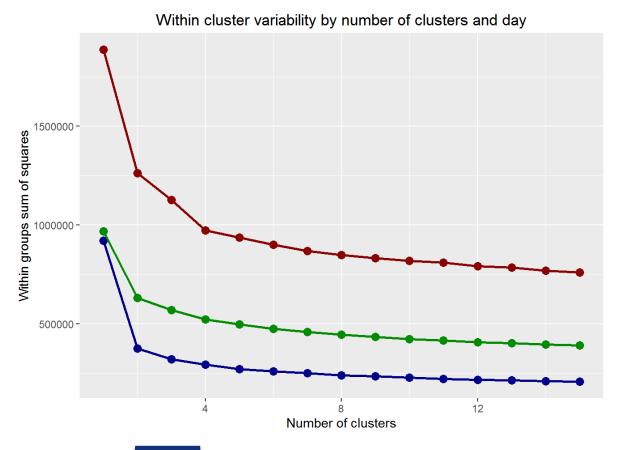

Mobile phone - population

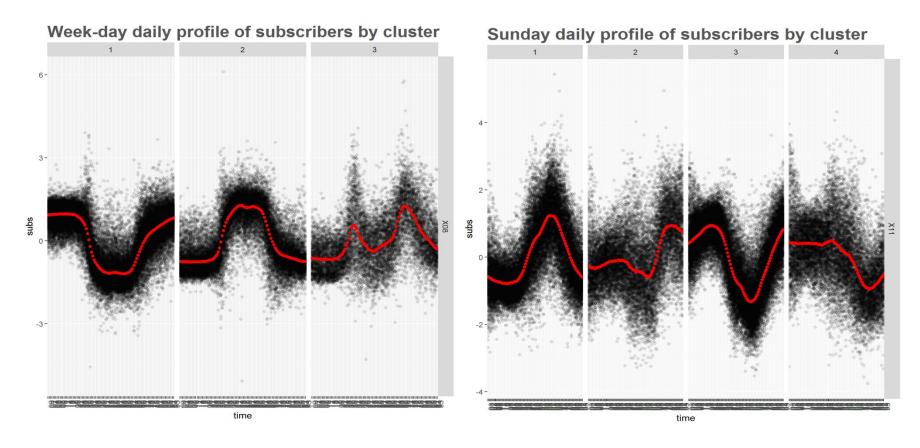

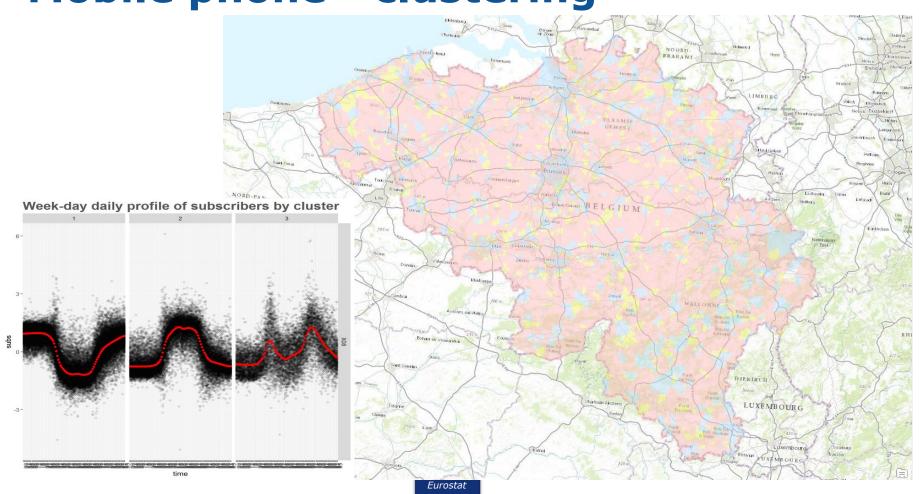

- Typical patterns of population density?
- Normalised counts of mobile phones
- Residential, Work, Commuting

Mobile phone pilot - continuation

- Continuation of exploration
- Add additional data
 - Traffic network
 - Land use data
- Mobile phone pilot within ESSnet
- Extension to other countries and operators
- Work on methodology, quality, ...
- Use of mobile phone data as complementary information

Thank you for your Attention!
