SDG DATA ALLIANCE

Summary

The SDG Data Alliance is an open, community-driven partnership that is working to accelerate the achievement of the SDGs by building capacity with people, technology, and process.

Our work is grounded in the recognition that reducing inequalities of all kinds (SDG-10) is fundamental to achieving all SDGs, and creating a just, healthy, and prosperous world where no one is left behind and everyone can thrive.

There must be progress on SDG 10 for all other SDGs to succeed.

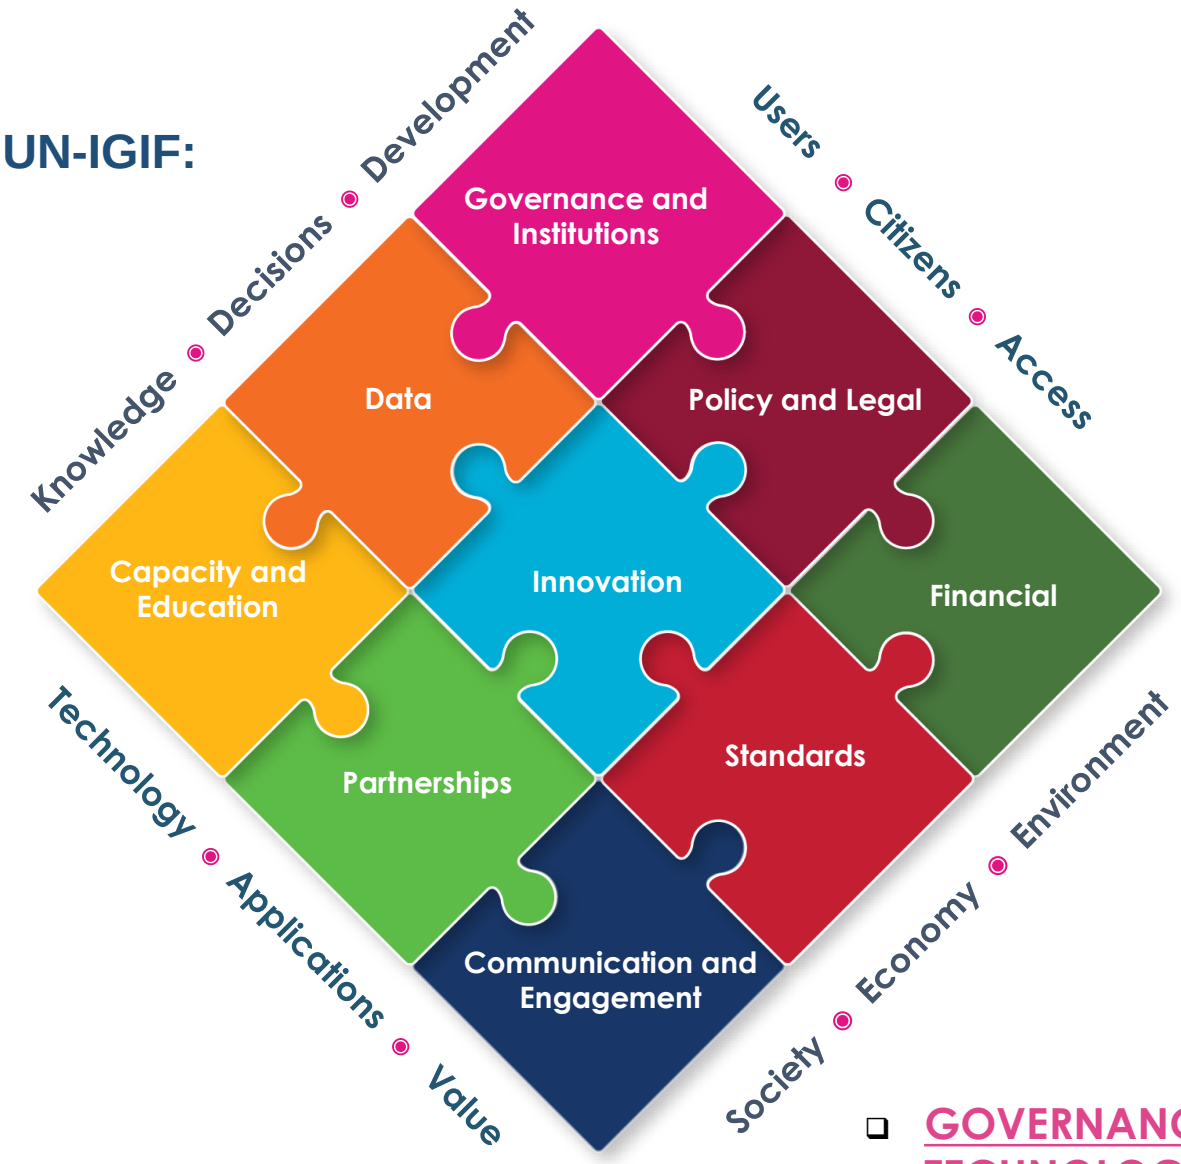
- Michelle Bachelet, UN OHCHR

SDG DATA ALLIANCE

Objectives

- **Leverage and strengthen** the in-country expertise from geospatial experts through implementation of the UN-IGIF within and across governmental agencies and organizations leveraging SDG data hubs
- **Address national and global reporting** requirements to report on the SDGs - with specific focus on SDG 10
- **Accelerate achievement of the SDGs** by accurately identifying areas for focus and investment

The UN-IGIF:



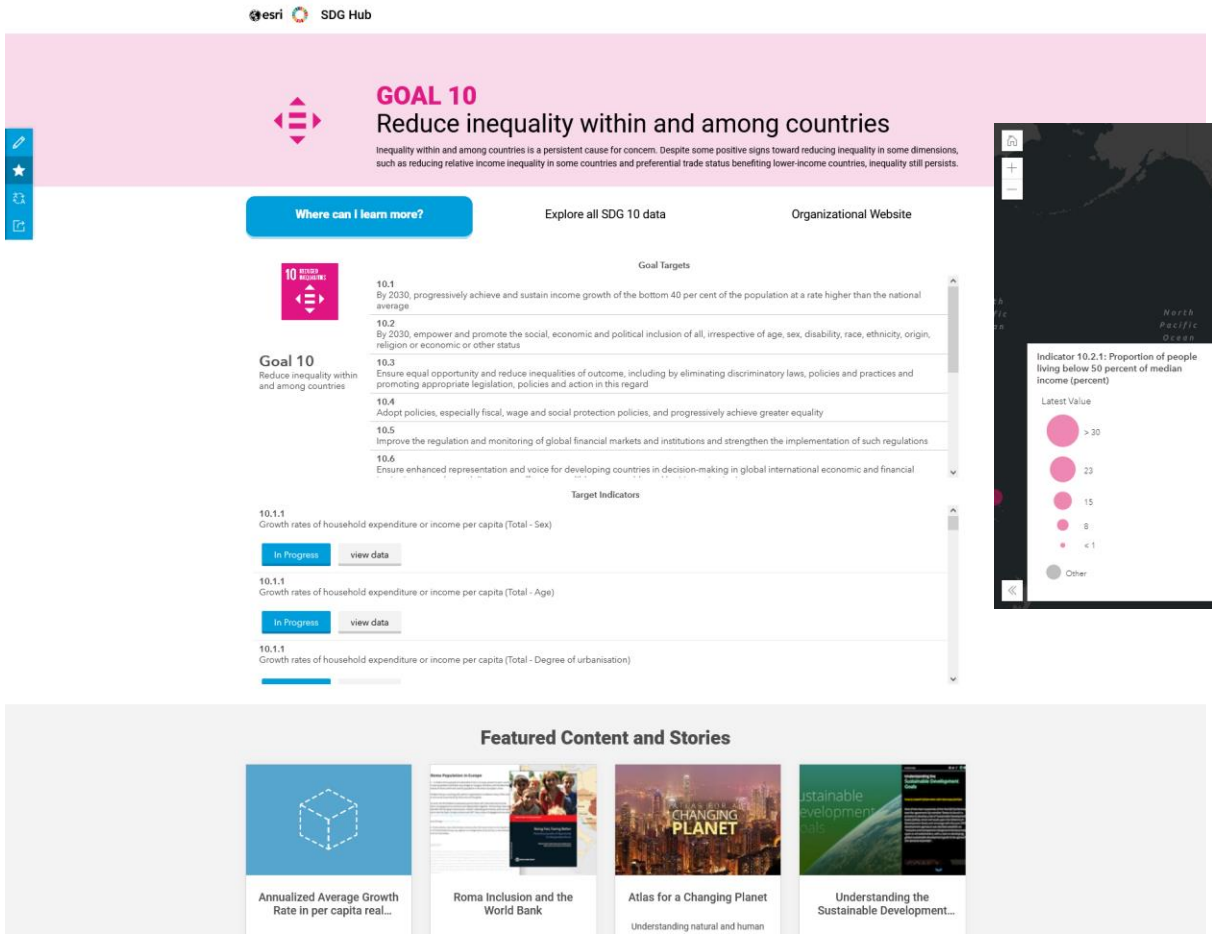
- GOVERNANCE
- TECHNOLOGY
- PEOPLE

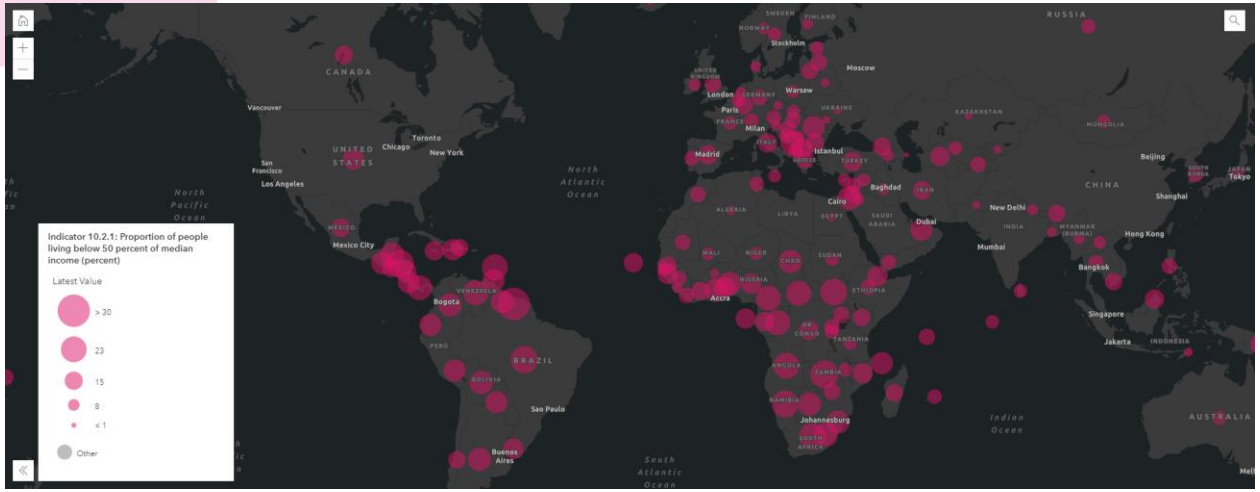
Intended Outcomes

Targeting ~17 UN member states:

- Implement UN-IGIF thru capacity building and technology implementation
- Configure and deploy national SDG Data Hubs - open interoperable, standard-based, serviced oriented platform
- Continuous knowledge and communication activities via the SDG Data Alliance to 2030 and beyond

SDG Data Hub: Template





Prospective Member States

- Brazil
- Cameroon
- Chile
- Fiji
- Ghana
- Guatemala
- Honduras
- India
- Indonesia
- Mexico
- Moldova
- Mongolia
- Morocco
- Mozambique
- Nepal
- Philippines
- Rwanda
- Senegal
- South Africa
- St. Lucia
