

## Thirteenth Plenary Meeting of UN-GGIM: Europe

Session 1: The Europe Region Work Plan - 23 June 2026 13:50 – 14:45

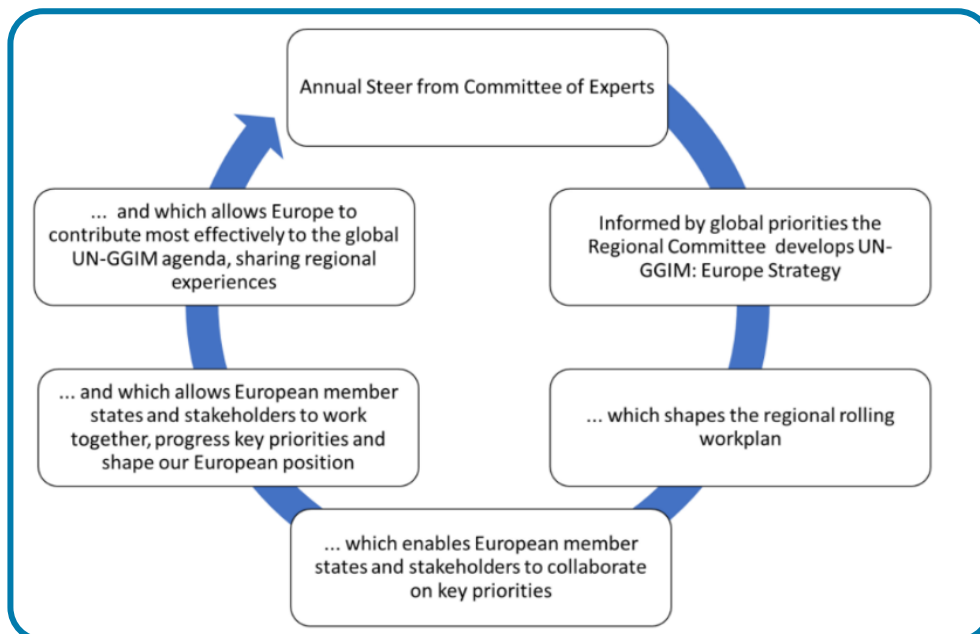

UN-GGIM: Europe Work Plan 2026-2030

### Concept Note

#### 1. Context

The UN-GGIM: Europe Strategy 2025-2030 was adopted by UN-GGIM: Europe at its Twelfth Plenary in June 2025. In addition to adopting the strategy, the Plenary requested that the Executive Committee should undertake a review of the existing work plan, and if necessary, develop a new work plan which to support the delivery of the strategy. It was discussed that a new work plan should be the link between the strategy and the operational delivery allowing Member States and observers of UN-GGIM: Europe contribute to achieving the vision and mission of UN-GGIM: Europe.

One of the core principles of the UN-GGIM: Europe Strategy is that it has been developed to make sure that our European activities respond to the changing needs and requirements of the annual Committee of Experts meeting, the priorities of Member States, and to provide a feedback loop into the global agenda of UN-GGIM at the Committee of Experts meetings. This feedback loop is represented below.

# Europe Regional Committee of United Nations Global Geospatial Information Management

## UN-GGIM: Europe

Established by a United Nations Resolution

---

## 2. Background

Session 1: Implementing the UN-GGIM: Europe Strategy will showcase the proposed work plan to Member States and will provide opportunities for participants to share their views on the document before it is formally adopted during Session 6: Formal Business at the end of the Plenary.

A full paper has been provided to Plenary explain the background and rationale for the development of the work plan. The Work Plan 2026-2030 will have three Working Groups (and is flexible to allow Member States to suggest enhancement and additional activities. The Working Group will be:

1. **The UN Integrated Geospatial Information Framework in Europe.** This is a continuation of activities from the current work plan.
2. **Geodetic Reference Frames in Europe.** This is a continuation of activities from the current work plan.
3. **Data in response to global agendas.** This is a new activity.

## 3. Discussion points

During the discussion participant will be asked for their views on the proposed Working Groups.

- The work plan has been developed considering the views and requirements of Member States. Are there any gaps or missing activities that you would like to see included in the work plan. Please note any suggestions need to be supported by practical actions that Member States can develop into new Working Groups.
- How can we make sure that all European Member States, can participate in the activities of the Working Groups?
- Which of the three Working Groups is most relevant to your national priorities.
